

Are grants available to start or grow my business?

Prospective business owners often have the false belief that there are many sources or "federal", or "state" grant money available to start or grow their small business. Even though many publications and talk shows publicize grants to small businesses, grant money is very hard to find and is usually available for existing businesses to carry out certain specific tasks. Neither the Florida Women's Business Center nor the SBA has grant money available. [Click here for a listing of grant related websites](#)
